NOTICE TO MARINERS 54/2021

Lincs Windfarm Cable Route Survey

Mariners are advised that marine survey operations will take place along the length of the Lincs windfarm cable routes between KP7 and KP2.

Surveys are expected to take place from the 8th September by the survey vessel 'Noortruck' and last for a period of 2-3 weeks.

ROV operations will be carried out 2-3hrs either side of slack water. ROV operations involve the vessel remaining stationary whilst the ROV is deployed and recovered. Once deployed the ROV will inspect the cable whilst remaining within 300m of the vessel.

Outside of the slack water period, the vessel will be engaged in pole mounted acoustic surveying along the length of the cable route.

A wide berth of no less than 300m is requested at all times. 'Noortruck' will display the lights and shapes described in the International Regulations for Preventing Collisions at Sea and will maintain a listening watch on VHF CH 16

This notice will self cancel after the completion of works
