PORT INFORMATION

Lat 52 58' N; Long 000 01' W

Boston Dock

2.8 hectares

North Quay - 251m South Quay - 257m

West Quay - 137m

East End - Small craft with two ramps for Ro-Ro

Access Lock - Most vessels transit on the level, sill depth 7.5m at MHWS and 5.4m at MHWN, most vessels require 1.5m less draft than tide height to transit access lock. Max. size of vessel in dock 119m LOA and 13.6 beam

Riverside Quays - Construction of riverside quays will complete in Q2 2021 and all commercial vessels will use these NAABSA berths whilst works are being carried out to the wet dock entrance.

*** During the wet dock entrance works, all vessels must be checked for suitability with the harbour authority ***

Navigation - The port covers 245 sq kilometres of The Wash, buoys are maintained to mark the approach channels. The Haven is navigable for commercial shipping for the first eight kilometres and 32 lighted river beacons allow safe passage on any tide.

Depths on berth and in the approaches are regularly measured and maintained by the Port's own survey system and dredger. Normally 1.5m less than predicted HW is required to pass over Boston Sill.

The Lock - is operated to allow normal vessels to arrive/depart from two and a half hours before and one and a half hours after high water. Special locks outside these times can be arranged, subject to tide.

Radio - Boston Port Control listens on channel 12 from two and a half hours before to one and a half hours after high water when commercial ships are moving. Vessels may use the station for berthing advice/information and as a relay service for agents or general communications. Tel: 01205 365571 is manned 24 hours per day.

Pilotage - Compulsory for vessels over 30m from Boston No. 9 Buoy. A non-compulsory service is available from No.1 Buoy. Pilots board from fast launches and should be ordered through Ships Agents, Pilot Master or Port Control.

GENERAL NOTICES

The Port of Boston Ltd., operates to the standards set in the Port Marine Safety Code. This code states that Harbour Authorities have a duty to take reasonable care, so long as the harbour is open for public use, that all who may choose to navigate it may do so without danger to their lives or property. The function of a H.A. is to regulate and facilitate the exercise of these rights. Safety within the harbour is not just a matter for the H.A. and its staff; users are also required to minimise the risk to themselves and others. Users should therefore consult with the H.A. if in any doubt regarding the safety of any actions they may be contemplating within the harbour.

The Port of Boston complies with current legislation, including areas relating to Oil Spill Contingency, Waste Disposal and Dangerous Substances in Harbour Areas. By Laws and Local Notices to Mariners are in force and are available for sighting at the Harbour Masters Office, given reasonable notice. All craft, commercial, pleasure (includes jet skis and other recreational craft) and fishing vessels should abide by the international Regulations for the Prevention of Collisions at Sea (unless superseded by local rules) and keep a listening watch on VHF ch. 12.

Part of the Harbour Area is contained within environmental regions such as SSSI, SAC and all mariners are requested to have due regard for the flora and fauna in the region. Particular care should be paid to the large colonies of seals, to be found on the sand banks, no attempt should be made to approach these animals. Care should be taken to protect the flood banks and speed limits should be adhered to, unless authority is received from the H.A. The Port of Boston is represented on The Wash and North Norfolk Marine Partnership.

Sunrise/Set Tables are in GMT.

The Port of Boston complies with current H & S laws & its Policy is to provide and maintain safe and healthy working conditions for our employees, contractors and casual labour working on our behalf. In addition, we will seek to ensure that the work we carry out does not affect the health and safety of others, e.g. members of the public and our customers, this includes the Master and crew of vessels in the Port.

The directors of Port of Boston Limited recognise and accept their responsibilities under the Port Marine Safety Code and the H & S at Work Act 1974, for ensuring that all aspects of this health and safety Policy are complied with.

The Port has a policy not to allow vessels to sail in an **overloaded condition**, if there is any doubt the master will be requested to confirm to the Pilot or Port Management in writing he is not overloaded.

The Port has a policy not to allow vessels to transit its waters if the pilot or a member of Port Management considers the Master or crew are under the **influence of drink or drugs** or seriously affected by lack of adequate rest periods. Port personnel may call Police to conduct breath tests, if deemed necessary.

Masters are required to comply with **the Dangerous Substances in Harbour Areas Regulations, Port Waste Management Regulations and ISPS Regulations** including the notification procedures contained therein.

The Harbour Authority is statutorily required to report every vessel with an IMO number to the MCA, via CERS. It is imperative that the H.A. is given full and accurate details by the ships agent.

Notifications to - Email: portcontrol@portofboston.co.uk

Marpol Waste Bins are provided for the use of Ships Domestic Refuse **only**. Any other type of waste, including special waste, empty paint and oil drums should be disposed of only after agreement with the Port via your agent. Category 1 Non-EU International Catering Waste must be placed only in clearly designated skips.

It is the Masters responsibility to provide a **safe means of access** to the vessel complete with adequate lighting at the access area and in the ships hold and on deck whilst shore personnel are in the area. Ships personnel who enter cargo holds and working areas do so at their own risk. Notification should be given to the stevedores of any personnel in such areas.

Responsibilities of Masters and Crew

Masters and Crew have a responsibility to co-operate in the implementation of this Health and Safety Policy. All persons have a duty to ensure their own safety and the safety of others under the H & S at Work Act 1974. Persons must therefore: Take reasonable care, wherever possible to avoid injury to themselves and others.

Use all equipment and protective clothing where & when it is required, and in the correct manner. Any equipment brought on to the dock must be in a safe condition for use. Report all accidents, injuries, near misses, spillages and any other potential safety hazards, promptly to the Harbour Master, or his Deputy or Port Security.

Not misuse anything provided in the interests of health and safety. It is expected that all ships that fall under the ISM Code, comply with that code at all times.

e-mail: slurryorders.emps@elkem.no

With depots around the UK, we are your first choice supplier of transport, ISOtank storage and tank cleaning.

Dangerous and non-dangerous goods handled as well as foodstuff.

ISOtank transport can be arranged for both national and international journeys.

A full team of qualified ADR Drivers who can handle dangerous goods and also have product specific training.

Our nationwide engineering teams can assist with leaks, spills and tank repair both on and off site.

To find out how we can service your business please call Simon Page on +44 (0) 1482 702185 or find depot details on our website at:

www.hpfreightways.com or www.tankclean.org

First Choice Supplier to Industry since 1975

MARINE POLICY STATEMENT

The Port of Boston hereby affirms that it will undertake and regulate marine operations within the harbour limits in such a way that safeguards the harbour, its users, the public and the environment.

All marine activities will be conducted in accordance with the Port Marine Safety Code.

Any incident occurring will be investigated thoroughly and lessons learnt will be published and promulgated to the marine community.

Deviations from published navigational information (aids to navigation, depths of water etc.) will be published by means of local notices to Mariners and will be uploaded to the Ports website. www.victoriagroup.co.uk

Personnel training and medical fitness will be continuously monitored to ensure standards are maintained.

The Port's Marine Safety Code will be maintained in conjunction with the Port's Safety policy and the Statement of company Policy.

Due diligence will be maintained with regard to the environment bearing in mind that the Wash is a Site of Special Scientific Interest (SSSI), a Special Area of Conservation (SAC) and a Special Protected Area (SPA) under the Habitats Directive and the Birds Directive.

Safety Instructions

General Rules	<ul style="list-style-type: none"> • Ships gangways must be properly rigged and available whilst alongside. • Ships crew must not stand in a position on the vessel, quay or warehouse that would endanger themselves, whilst a cargo is being loaded or discharged. • Always be aware of other traffic on site in particular fork lifts, railway crossings and train movements. • To contact emergency services dial '999' and/ or contact main office on 01205 365571 • No hot work or diving to be performed without a risk assessment being completed and a permit to work obtained from the Harbour Master. • Never stand under a load that is being lifted. Ship hatches must not be moved without informing the stevedores first.
Traffic Rules	<ul style="list-style-type: none"> • Personnel must follow designated routes while on site. • The speed limit of 15 MPH must be strictly observed. • Personnel must use designated walkways • Drivers must not reverse their vehicles unless instructed by a supervisor.
Warehousing	<ul style="list-style-type: none"> • No food is allowed to be consumed in the warehouses. • Ships crew are not permitted in any warehouse unless invited by Port Management • All waste must be placed in the Marpol skips provided. • No smoking in any Warehouse.

Site Safety Rules

Health & Safety at Work Act 1974
Persons entering these premises must comply with all safety regulations under the above act.

Protective footwear must be worn

Hard hat area

High visibility jacket must be worn

Caution fork-lift trucks operating

CCTV in operation

Beware Deep Water

NOTES

PROJECT KRAKEN:

Report any suspicious marine activity to the Police on either 101 or 999 quoting Operation Kraken when giving information.

BARRIER PROJECT:

Works will be continuing throughout 2021 on the Boston Tidal Barrier Project. Important information relating to river users will be sent out by Notices to Mariners and on the Ports website. www.victoriagroup.co.uk Further information is available from the Environment Agency as the project progresses.

www.lincolnshire.gov.uk/lincolnshire-prepared/news/flood-ing-and-the-boston-barrier/122506.article

Further information will be available from the Environment Agency as the project progresses.
