NOTICE TO MARINERS 039/2020

South Bank – Capping Beam Construction

Mariners are advised that works are to imminently commence on the construction of the sheet pile capping beam on the South (right) Bank of the haven in the vicinity of both the upstream and downstream sides of the Boston Flood Barrier.

Works include the temporary installation of Dawson brackets on the riverside of the piles to provide a temporary work platform and are expected to be in place for approximately two weeks.

The presence of the Dawson brackets will not interfere with the Barrier but Mariners are reminded to navigate with caution in the vicinity.
