NOTICE TO MARINERS 046/2020

Barrier – Emergency Landing Facilities

In the event of a mechanical breakdown of a vessel close to the construction works, the contractors have requested, wherever possible, that vessels use the Emergency Landing Facilities either side of the Barrier. Where this is not possible, mooring at the new sheet pile line will not damage the works and therefore could be used. Mooring at the temporary platforms is **prohibited** as this could cause significant damage to the platform and such damage may not be noticed by the contractors when they next come to use them.

As always, in the event of a hazardous or emergency situation, the Barrier Guard Vessel remains on duty at the times set out in the monthly Notice to Mariners. Also, vessels may call Port Control on VHF Channel 12 and request assistance, the Port will do its utmost to assist given the limitations of boats and available crew.
